

# WOW!

## LOVE, SAVE, SHARE!

Jamila learns that she can wash her hands and brush her teeth without running sooo much water! She **LOVES** water, so she shuts the faucet off.

Jamila tells her friends Alejandra and Campbell. They shut their faucets off, too!

The Brownie friends tell their class what they are doing. All the kids work together on a project to really **SAVE** water!

The class **SHARES** what they are learning and doing about water with the whole school. So the whole school gets inspired, too.

The kids at the school **SHARE** what they are learning and doing with kids at all the other schools in their state. Now all the kids across the state are inspired to . . .

And then . . .

When people **LOVE WATER**, work together to **SAVE** it, and then **SHARE** what they know with even more people, here's what happens:

# WOW!

Your very own Brownie Team story! Show and tell your story of how you **LOVE** water, how your team worked together to **SAVE** water, and how you went on to **SHARE** what you learned to get others protecting water, too!  
Use your imagination! Maybe you can make one giant story with your team.

I **LOVE** water because . . .

I learned to show my **LOVE** by . . .

Then our whole Brownie Team decided to . . .

That's important because . . .

We **SAVED** water by . . .

But we weren't done . . .

We **SHARED** what we were doing with \_\_\_\_\_

And now . . .
