Try it! Create artwork that shows your future dream job in STEM (science, technology, engineering, and math).

Explore our full STEM Career Exploration program by grade level at the [Girl Scout Shop](https://www.girlscouts.org/shop/) or in the [Volunteer Toolkit](https://www.girlscouts.org/volunteer-toolkit/).

**Daisy STEM Career Exploration**
(kindergarten–1st grade)

Imagine your future. What do you like to do? Do you like animals or nature? Computers or video games? Print the next page and decorate the frame with pictures of your favorite things. Draw a “future you” in the middle! What’s your job? What are you doing? Are you using a tool? How are you using STEM?

**Brownie STEM Career Exploration**
(grades 2–3)

What does the future look like? Print the next page and draw a picture of yourself in your future job. What are you wearing—an apron, lab coat, or jeans and a t-shirt? What tools are you using—a computer, stethoscope, or 3D printer? Where are you—in a lab, park, or hospital? Share your vision with your family, friends, and teachers. They can help you follow your dreams. Look at your drawing whenever you want to imagine your future!

**Junior STEM Career Exploration**
(grades 4–5)

Imagine yourself in the future. How do you see yourself when you’re all grown up? What job will you have? Print the next page and use it to frame your vision. Draw different next steps you can take to reach it. What’s something you can do at school, at home, by yourself, or with others? What’s a new skill or wild idea? Add words and pictures that motivate you. Show your strengths and interests and how you plan to use STEM to make a difference. When you’re done, share your vision board with others to show how you’ll make the world a better place.

Made possible by a generous grant from General Motors.
